

Jeff Maxwell - Full-Stack Developer

2025

Self-Taught Full-Stack Developer | Hispanic Studies Scholar jeff@el-jefe.me | 508.395.2008 el-jefe.me |
github.com/maxjeffwell

PROFESSIONAL SUMMARY

Self-motivated full-stack developer with demonstrated ability to independently master modern web technologies through intensive self-directed learning and immersive bootcamp training. Successfully built and deployed 6+ production-ready applications using React, Node.js, GraphQL, and cloud platforms. Combining analytical skills from summa cum laude Hispanic Studies education with technical expertise to create user-centered applications. Phi Beta Kappa scholar bringing exceptional research abilities, cross-cultural communication skills, and proven capacity for complex problem-solving.

TECHNICAL PROFICIENCIES

Core Technologies

JavaScript ES6+ React 16-18 Node.js Express GraphQL MongoDB PostgreSQL Git/GitHub
Redux/Redux Toolkit JWT Authentication RESTful APIs CRUD Architecture Passport.js BCrypt

Frontend Development

React Hooks Context API React Router Styled Components Emotion Tailwind CSS
Webpack Babel Gatsby Responsive Design CSS Grid/Flexbox Semantic UI

Backend & Database

Apollo Server/Client Mongoose Sequelize Firebase WebSockets Middleware
Error Handling API Design Data Validation Schema Design Query Optimization

DevOps & Tools

Heroku Vercel Travis CI Mocha Chai Enzyme Test-Driven Development
Continuous Integration Docker Basics Serverless Functions Chrome DevTools Postman

PORTFOLIO PROJECTS

EducationELLy - Full-Stack Educational Platform

Live Demo | GitHub | React Redux Toolkit Node.js MongoDB JWT

Technical Achievement: Built comprehensive student management system demonstrating full-stack proficiency

- **Frontend:** Implemented complex state management with Redux Toolkit, including async thunks and normalized data

- **Backend:** Designed RESTful API with 15+ endpoints, middleware authentication, and comprehensive error handling
- **Database:** Structured MongoDB schemas with Mongoose, including data validation and relational references
- **Authentication:** Secure JWT-based auth flow with Passport.js, refresh tokens, and protected routes
- **Testing:** Integrated Mocha/Chai test suite with 85% code coverage

Code Talk - Real-Time Collaborative Platform

GitHub | GraphQL Apollo WebSockets PostgreSQL Redis

Technical Achievement: Mastered GraphQL and real-time technologies through self-directed learning

- **GraphQL:** Designed complete schema with queries, mutations, and subscriptions for live collaboration
- **Real-time:** Implemented WebSocket connections using Apollo subscriptions for instant messaging
- **Performance:** Optimized database queries with DataLoader, eliminating N+1 query problems
- **Architecture:** Microservices pattern with separated client/server, proper error boundaries
- **Database:** PostgreSQL with Sequelize ORM, connection pooling, and transaction management

Bookmarked - Modern React Application with Serverless Backend

Live Demo | GitHub | React 18 Hooks PostgreSQL Serverless

Technical Achievement: Demonstrated evolution from class components to modern React patterns

- **Modern React:** Complete refactor using Hooks (useState, useEffect, useContext, custom hooks)
- **Serverless:** Implemented Vercel Functions for API routes with automatic scaling
- **Database:** Neon PostgreSQL integration with prepared statements and connection pooling
- **Performance:** Sub-second load times through code splitting, lazy loading, and optimized bundles
- **Progressive Enhancement:** Offline support, PWA features, responsive design

FireBook - First Full-Stack Application

Live Demo | GitHub | Vanilla JS Firebase Cloud Firestore

Technical Achievement: Capstone project demonstrating progression from fundamentals to deployment

- **Vanilla JavaScript:** Built entire SPA without frameworks, demonstrating core JS mastery
- **Firebase Ecosystem:** Integrated Authentication, Firestore, Cloud Functions, and Hosting
- **State Management:** Implemented custom state management solution with pub/sub pattern
- **Responsive Design:** Mobile-first approach with CSS Grid and Flexbox

Developer Portfolio - Performance-Optimized Static Site

Live Site | GitHub | Gatsby GraphQL Framer Motion PWA

Technical Achievement: Achieved perfect Lighthouse scores across all metrics

- **Static Site Generation:** Gatsby 5 with GraphQL data layer for build-time optimization
- **Performance:** 100/100 Lighthouse score, sub-second load times, optimized images
- **Animations:** Smooth transitions with Framer Motion and CSS animations
- **SEO & Accessibility:** Structured data, semantic HTML, ARIA labels, meta optimization

EDUCATION

Thinkful | New York, New York | 2019

Engineering Immersion Program - Full Stack Web Development

- Intensive 6-month program with 1000+ hours of coding practice
- Curriculum emphasis on modern JavaScript frameworks (React, Node.js, Express)
- Workflow based on pair-programming principles and agile methodology
- Advanced computer science topics including data structures and algorithms
- 1-on-1 mentorship with industry professionals

Trinity College | Hartford, Connecticut | *May 2017*

Bachelor of Arts, Hispanic Studies - *Summa Cum Laude*, GPA: 3.91

- **Honors Thesis:** *¡Ya basta! Las enseñanzas místicas del subcomandante Marcos y la otra realidad* (The Mystical Teachings of Subcomandante Marcos and The Other Reality)
 - **Phi Beta Kappa Society** - Elected to oldest academic honor society in the United States
 - **President's Fellow** - Language and Culture Studies
 - **Writing Center Associate** - Selected as specialized bilingual writing advisor
-

SELF-DIRECTED LEARNING JOURNEY

Continuous Technical Development (*2019-Present*)

- **Post-Bootcamp Growth:** Expanded from MERN stack to GraphQL, TypeScript, serverless architectures
- **Open Source Contributions:** Active contributor to educational technology projects
- **Technical Writing:** Documented learning journey through technical blog posts and tutorials
- **Community Engagement:** Regular participation in Stack Overflow, Reddit r/webdev, Discord communities

Learning Metrics & Achievements

1000+Bootcamp Hours

500+Self-Study Hours

50,000+Lines of Code

6Deployed Apps

LEADERSHIP & HONORS

Academic Distinctions

- **Phi Beta Kappa Society** (*2017*) - Recognition for academic excellence and intellectual engagement
- **Summa Cum Laude Graduate** - Highest distinction, top 5% of graduating class
- **Dean's List** - All eligible semesters

Leadership Roles

- **President's Fellow, Trinity College** (*2016-2017*)
 - Met bi-weekly with college president to discuss campus initiatives
 - Co-edited Trinity Papers, annual journal of outstanding undergraduate scholarship
 - Selected from entire student body for leadership and academic achievement
 - **Writing Associate, The Writing Center** (*2015-2017*)
 - Faculty-recommended position as specialized bilingual writing advisor
 - Collaborated with students on academic writing in English and Spanish
 - Developed workshops on cross-cultural communication and academic writing
-

CORE COMPETENCIES

Technical Strengths

- Full-stack development capability
- Test-driven development
- Agile/Scrum methodology
- Pair programming experience
- Clean, maintainable code

Professional Skills

- Exceptional research abilities
- Cross-cultural communication
- Technical documentation
- Complex problem-solving
- Self-directed learning

Languages

English: Native | **Spanish:** Working fluency | **JavaScript:** See my elephant mascot at el-jefe.me/about

WHAT I BRING TO YOUR TEAM

Academic Excellence - Proven track record of achievement and intellectual rigor

Technical Proficiency - Strong foundation in modern web development technologies

Research Skills - Ability to quickly learn and master new technologies independently

Communication - Exceptional written and verbal skills from humanities background

Cultural Competence - Bilingual abilities and cross-cultural understanding

Growth Mindset - Continuous learner passionate about technology and innovation

Available for immediate start • Eager to contribute to mission-driven teams
